DETAILED ACTION

This communication is responsive to the amendment filed October 4, 2004.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

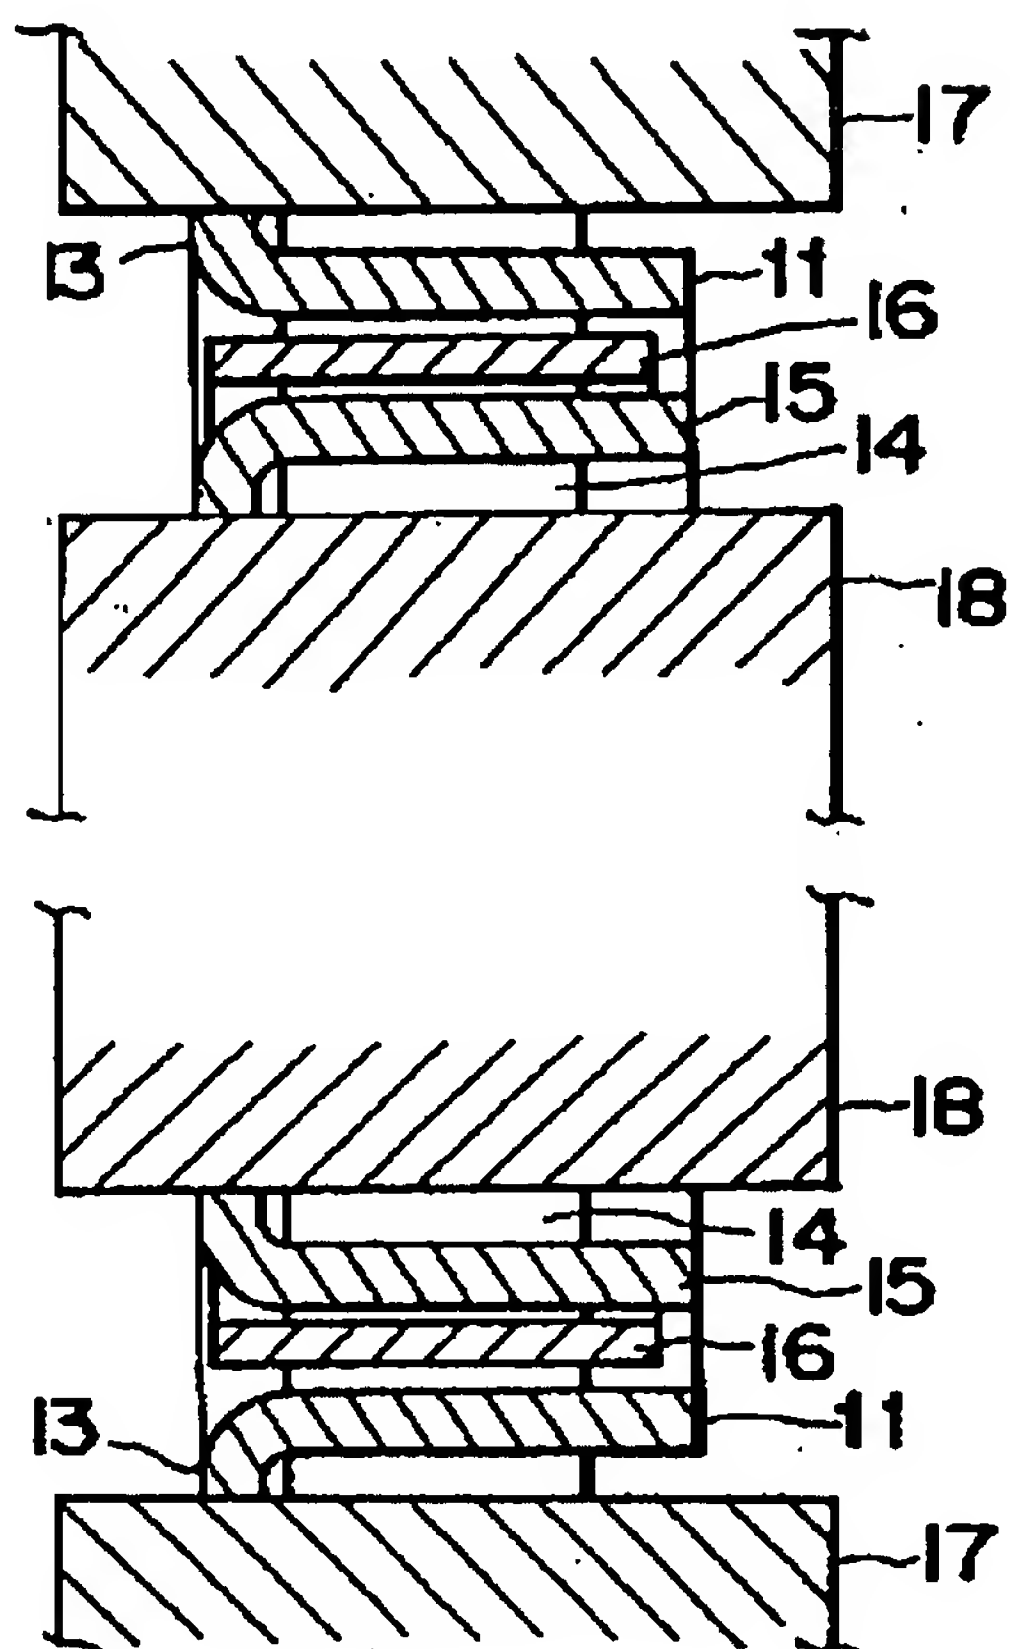

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fujiwara et al. ('013) in view of Griffin et al. ('670).

Fujiwara et al. discloses a one-way clutch comprising plurality of sprags (14), first and second cages (11, 15), an annular spring (16), a constant pitch, and aligned pockets (12). Fujiwara et al. does not show non-retaining pockets. Griffin et al., on the other hand, discloses the general principle of removing/adding rollers from a cage depending on the load requirements (Col. 2., lines 3-6). Then, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to

Art Unit: 3681

remove roller, resulting in empty pockets, on the device of Fujiwara et al. ('013) in view of Griffin et al. ('670) to reduce the number of part.

Response to Arguments

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.
